

Firefly – Supported AWS Resource Types

The Terraform resource types below are natively discovered, codified, and governed by Firefly across connected AWS accounts — spanning compute, networking, storage, data, security, and AI/ML services.

300 resource types · sorted alphabetically

• <code>aws_acm_certificate</code>	• <code>aws_cloudfront_origin_request_policy</code>	• <code>aws_ebs_volume</code>
• <code>aws_ami</code>	• <code>aws_cloudfront_realtime_log_config</code>	• <code>aws_ec2_traffic_mirror_filter</code>
• <code>aws_api_gateway_api_key</code>	• <code>aws_cloudhsm_v2_cluster</code>	• <code>aws_ec2_traffic_mirror_session</code>
• <code>aws_api_gateway_authorizer</code>	• <code>aws_cloudhsm_v2_hsm</code>	• <code>aws_ec2_traffic_mirror_target</code>
• <code>aws_api_gateway_base_path_mapping</code>	• <code>aws_cloudtrail</code>	• <code>aws_ec2_transit_gateway</code>
• <code>aws_api_gateway_documentation_part</code>	• <code>aws_cloudwatch_composite_alarm</code>	• <code>aws_ec2_transit_gateway_peering_attachment</code>
• <code>aws_api_gateway_documentation_version</code>	• <code>aws_cloudwatch_dashboard</code>	• <code>aws_ec2_transit_gateway_peering_attachment_accepter</code>
